

## Accessibility statement for Gaudania's website

In recent years, websites have become the main platform for publishing the various information and services offered by the company to the general public.

The Gaudania company is a subsidiary of Dania Sibus company and specializes in foundation, deposition, and advanced geotechnic work. This website provides extensive information about the Gaudania company, about the company's fields of activity and selected projects.

Our goal in making the website accessible is to create equal opportunities space for people with various disabilities and people who use various assistive technologies when browsing the Internet.

### Accessibility adjustments on the website

Accessibility adjustments have been made on this website in accordance with the recommendations of the Israeli standard (TI 5568) and content accessibility on the Internet at the AA level in combination with the recommendations of the WCAG2.0 document published through the international organization W3C that deals with standardization on the Internet.

The adjustments made on the site were tested using the most common browsers: Google Chrome and Internet Explorer. In order to have a pleasant and optimal browsing experience with screen reader software, we recommend using the latest version of NVDA software.

In order to make the site accessible to people with disabilities, a large number of actions were carried out, including:

- Adjusting the site for easy and convenient navigation via keyboard.
- Using a clear and prominent frame during the use of focus when the user navigates the site with the keyboard.
- Use of appropriate visual contrast between the text and background color.
- A search pane was added for better orientation on all website pages.
- A quick option to move to the main content on the page when pressing the TAB key was added.

### **Adjustments made on the site for surfers using screen reader software:**

- Adding alternative text to the images appearing on the website.
- Use of simple and clear language on all website pages.
- The accessibility component (accessibility plugin) was installed.

As part of the website's accessibility process, we implemented an accessibility plugin that allows convenient use and improving the user's experience on the website.

Browsing the website using the accessibility plugin is recommended using the latest version of the Google Chrome browser. When using other browsers that are not updated, there may be compatibility issues between the required action and the actual change within the site.

In order to activate the options available in the accessibility component, navigate to the accessibility icon or click with the mouse on the "accessibility" icon that appears at the top of the screen.

The menu in the accessibility component includes the following adjustments in the following order:

1. Increasing font size.
2. Reducing font size.
3. Font size reset
4. Create dark contrast.
5. Create bright contrast.
6. Switch to black and white display.
7. Switch to readable font.
8. Link underlining.
9. framing focused components.

The consultation and guidance regarding the accessibility of the website of the Gaudania company was carried out by the [WEB-A website, apps and advanced systems accessibility services](#) team.

### Accessibility arrangements for the company's offices

The accessibility arrangements for the main office located at 1 C Yoni Netanyahu St., Or Yehuda:

- Accessible parking spaces - in front of the building or in the underground parking lot with prior notice.
- Accessible entrance.
- An accessible bathroom on the 2nd floor.
- Accessible public reception positions.
- Induction loop hearing aid.

The Gaudania company team believes that every person with a disability should have the ability to use and purchase the services offered on the website in an equal, enjoyable, and experiential manner.

Special changes and adjustments have been made to this website using the latest and most suitable technology for the needs of our customers and website surfers.

However, it should be clarified that certain elements may not be fully accessible or are in the process of being made accessible to people with disabilities.

Have you come across a component that is not accessible on the site? Contact us and we promise to check and improve it as soon as possible and of course to provide you with the best service in a fast, personal manner and according to your satisfaction.

### Accessibility coordinator details

The company appointed Yuval Atias as the company's accessibility coordinator.
